

**VIENNA CENTER
FOR MANAGEMENT
INNOVATION**

**PETER DRUCKER
SOCIETY EUROPE**

HIGH LEVEL SCIENTIFIC COUNCIL

PURPOSE OF THE COUNCIL

The High Level Scientific Council's purpose is to support the mission of the Drucker Society Europe and the Vienna Center for Management Innovation at the highest level by identifying the emerging themes we should focus on – the topics of most pressing concern to managers, the researchers who study management, and the consultants who advise organizations' leaders.

The Council members bring a wide perspective on the problems societies need businesses to solve, but they are also in close touch with current developments in the world of practice. The Council's collective thinking should be informed by Drucker's understandings of management as an engine of human progress and of business enterprises as vital "organs of society."
