

CLOSING THE RESPONSIBILITY GAP IN A COMPLEX WORLD

FIRST DRUCKER GLOBAL FORUM
VIENNA, AUSTRIA

20 November, 2009

Dean Ira A. Jackson

Peter F. Drucker and Masatoshi Ito Graduate School of Management
Claremont Graduate University

- **Need to channel Drucker to address the Accelerating Pace of Change and The Urgent Need to close the gap between What We Find Acceptable and What is Possible...**

- **The undeniable reality of complexity, speed and technological change around us as seen through the eyes of a YouTube video called ‘Did You Know?’”**

This accelerating pace of change also exists in terms of societal challenges

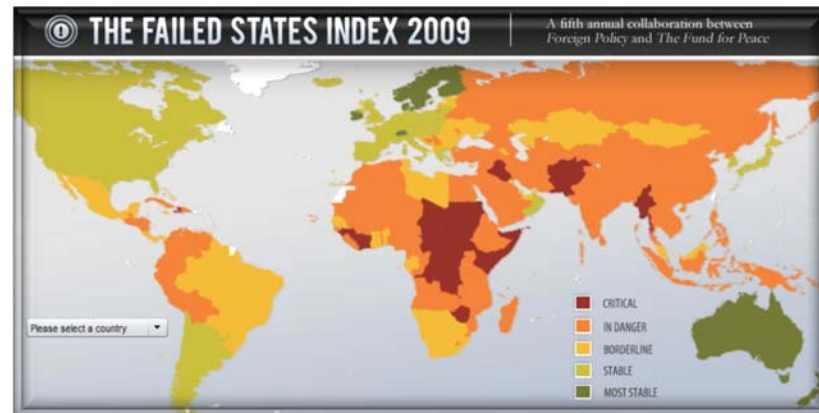

Terrorism

Global Warming

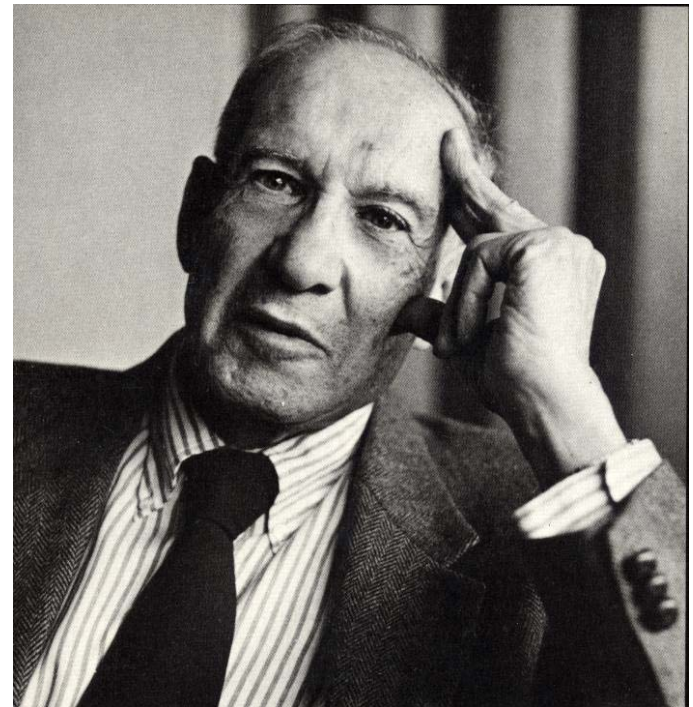

Poverty

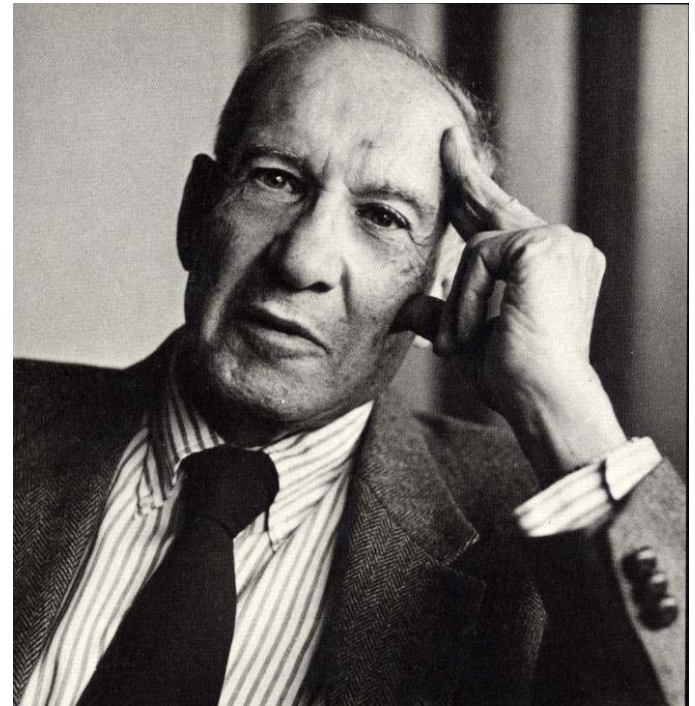

Failed States

Drucker was concerned about these issues

- **Much more than a management guru, he was a Social Ecologist**

- **What would he say about the health of our society?**

\$50 trillion

The financial cost of the global economic meltdown

50 million

The human loss in jobs lost

\$1 trillion

Every year, over \$1 trillion in bribes are exchanged worldwide.

56%

56% of graduate business students admitted to cheating one or more times in the past academic year.

5 hours

American CEOs earn
as much in 5 hours as
the average worker
earns in a year.

31%

On average, 31% of private-sector working time around the world is effectively wasted.

24,000

About 24,000 people die every day from hunger or hunger-related causes.

If the
Responsibility Gap
goes unaddressed,
society stands to perish.

ГИППОКРАТ

**Innovation
matters.**

- Every global and social issue of our day is a business opportunity in disguise

Values matter.

Effectiveness
matters.

Drucker's Functioning or Responsible Society

Business:
Efficiency
Innovation

Purpose
Partnership
Responsibility

Government:

Equity
Fairness

Civil Society:

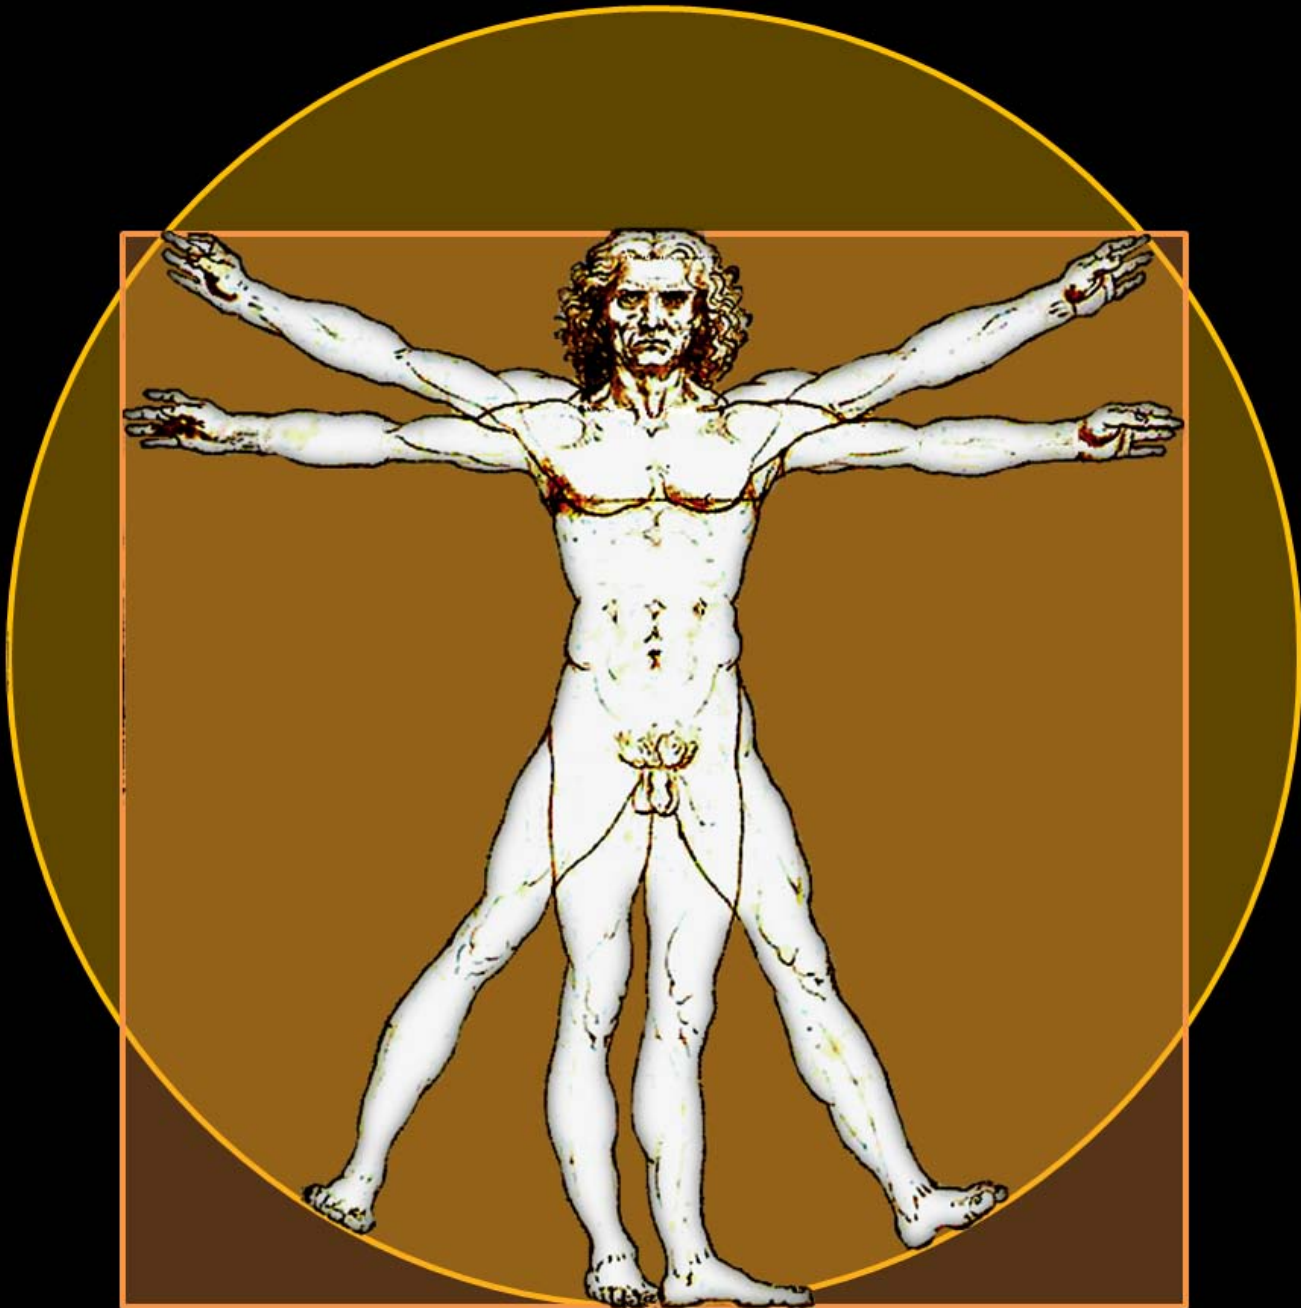

Legitimacy
Participation

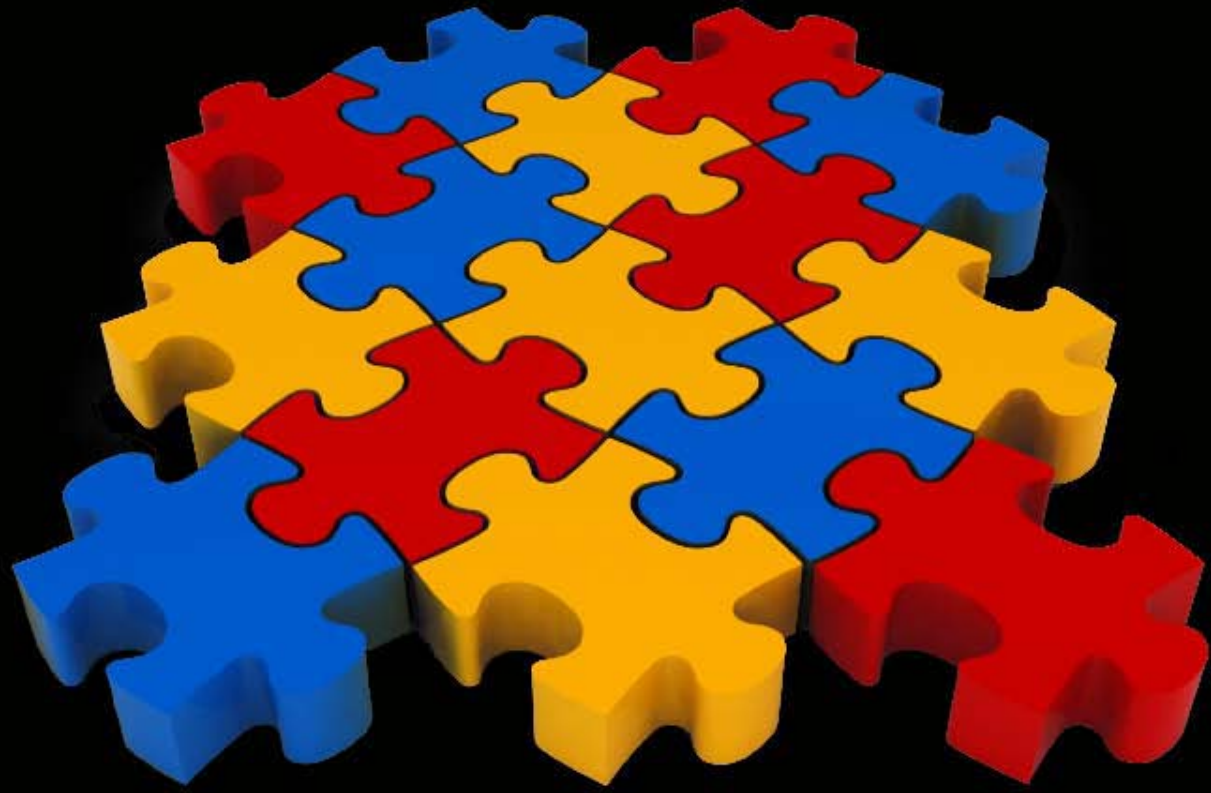

Government as a Conductor

Orchestrating,
coordinating

Steering... but not rowing.

We all matter.

“The best way to predict the future
is to create it...”

- Peter F Drucker
